

Fontainebleau Hitch

Our journey in at fontainebleau state park was not to far from home! We were only a little over an hour away from baton rouge. What a trip it was though, it is so gorgeous there. The wildlife was interesting we saw several deer, some wildhogs, and finally SOME ALLIGATORS!!!

The work we were doing consisted of tree falling in campsite areas to take down dead trees that were potential hazards. We also did some repairs around the park on some fences and boardwalks. The boardwalks we worked on were by the beach of lake pontchartrain. You could see new orleans in the far distance.

The whole park was such a beautiful place to get to work at. We also did some trailwork and some touch up painting and got invited to a crawfish boil that some of the frequent campers hosted. It was a Blast!
